DWSB Series

Reverse Osmosis System

The DWSB Series Reverse Osmosis Drinking Water System reduces harmful contaminants and turns common tap water into the fresh, quality water that nature intended us to drink. A 5-stage system filters water at the molecular level. Drawn water passes through a final carbon filter to remove any unwanted tastes or odors. The result is simply healthier, better tasting water.

- **Environmentally sound water treatment.**
- **Cost effective:** the daily cost of bottled water will no longer be a concern.
- **Convenient:** fresh, clean water ready at your tap - no more handling of jugs.
- **Easy to maintain:** uses standard 10" cartridge filters.

R.O. System Pre-Requirements
