NRS-1 Series

Nitrate Reduction System

The NRS Series nitrate reducer from Sterling is specifically designed to effectively treat most common nitrate problems found in well water sources. The NRS-1 is an affordable and efficient way to reduce unwanted nitrates from a point of use water source.

Product may vary from picture

- **Automatic Water Meter.** Easy set non-electric water meter shuts off outgoing water to indicate when the cartridge should be changed.
- **Cost Effective.** The daily cost of bottled water will no longer be a concern.
- **Reduces Nitrates.** Nitrates are reduced by utilizing the ion exchange process.
- **Long Reach Faucet.** Every unit contains a luxury long reach chrome faucet for elegant appearance and easy access to your treated water.
- **Easy to Change Filters.** Every housing includes a easy access wrench for cartridge changing.
- **Depressurizing Button.** A red button is included on all housings for quick depressurizing of the system when changing filters.
- **Easy Installation.** All systems include a wrench, bracket, water meter, luxury faucet, tubing, shut-off valves, fittings, and a saddle valve for a quick, no hassle, no mess install.

NRS Series Nitrate Filter
